

**CAUTION:**

In order not to have the mounting clips blocked, but reliably shifted, insert into the cartridge - guiding profile the **maximum of one set of clips, i.e. 50 pieces!**

**TACKER mounting device - use:**

For quick fixing of heating cables during installation. The mounting device is used to hammer plastic clips around the cable into the separation foil and thermal insulation.

Application of the clip is carried out by pressure applied on the handle. The spring serves for lifting up and keeping the handle in its upper position. The clip is moved under the hammer part, on the guiding profile by the pressure spring.

The mounting device simplifies the process of hammering clips around the cable into the thermal insulation. Cable fixing by clips is carried out while standing.

The mounting device is suitable for hard insulations, for example extruded polystyrene. Fixing the clips into hardened insulation manually is complicated.

**Technical description:**

Weight:	1.35 kg
Height:	90 cm
Max. number of the clips in the cartridge:	50 pcs
Pressure spring of the clips:	Yes

**Warranty coupon, 2-year warranty**

The warranty is null and void, if the manipulation was not performed by a professionally competent person or an error occurred by incorrect handling, incorrect installation or any other later damage. If we are asked to repair or replace such a mounting device, all the related costs will be charged.

Date of sale / Stamp:	Installation date:	The warranty is valid with these documents:  1. The Warranty coupon correctly filled in; 2. Purchase document: Invoice or purchase receipt. 3. The supplier's duty will be to repair or deliver a new mounting device to the customer free of charge, without any other extra costs related to the repair or Tacker replacement.
